

I am a frontend developer in search of exciting opportunities in order to help provide a better experience for web users. Shortly after I began my programming journey, I realized that it is a never-ending process. Programming has helped, or should I say forced, me to become more effective at solving complex problems. I have a tenacity for learning, being a dependable team player, and producing the highest quality work I possibly can.

Skills

React	Vanilla JavaScript	CSS
HTML	Object Oriented Programming	Responsive Web Design
Version Control (git)	Coding best practices	Command Line Interface

Portfolio

- My projects can be found at the link below. Projects displayed were programmed by me.
 - <https://ramizhida.github.io/Portfolio/>
- Built a responsive website for a renovation company, which can be found on my portfolio.
