WEB PROJECTS

Meet App   **Bayern, DE**
Full Stack Developer   *October 2023 – December 2023*

- Developed a Progressive Web Application (PWA) that was programmed with React following a test-driven and behavior-driven approach.
- Integrated a serverless backend with AWS lambda for authentication and authorization of users.
- Implemented unit function testing with Jest and end-to-end testing with Puppeteer resulting in a fully-tested web application which allows its users to filter for events using the Google Calendar API.

MyFlix Movie App   **Bayern, DE**
Full Stack Developer   *Sept 2023 - October 2023*

- Created a Single Page Application (SPA) with a client-side and server-side from scratch.
- Built a RESTful API with Node JS and Express, that communicates with a non-relational database (MongoDB) to store user data.
- Developed a responsive web application with React, that supports CRUD functionality and incorporates API testing with Postman, resulting in a user-friendly interface which allows its users to signup, browse different movies, and update their user info.

SKILLS

Frontend Development: React | React Native | JavaScript | TypeScript | Angular | HTML5 | CSS / SASS | Bootstrap | Test Driven Development (Unit Testing & End-to-End Testing) | Jest | Cucumber
